Overview

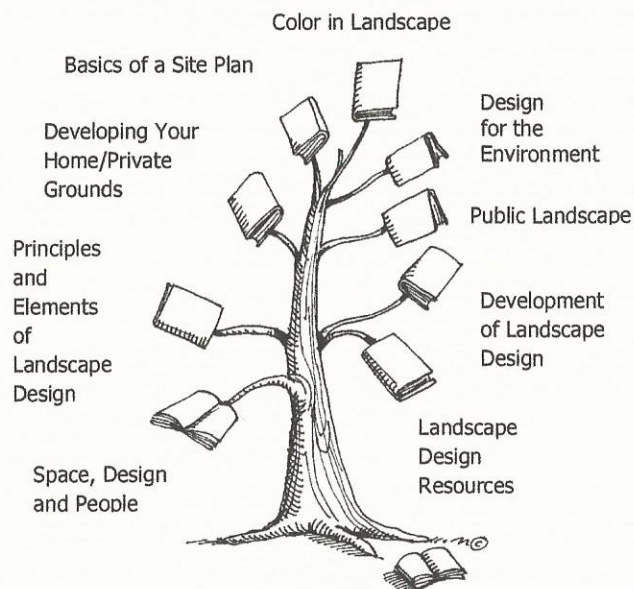

Helping members become landscape consultants and designers.

The Landscape Design Study Courses offer a series of four 10-hour courses. The courses cover the history of landscape design as well as instruction from landscape architects in a variety of design techniques used in home and municipal settings.

The curriculum covers a wide range of subjects from landscape design history to landscape architecture in the 21st century. Since its founding in 1958, professional instructors have maintained the high standards originally incorporated in the study program. Students acquire the tools for making their own gardens more beautiful and easier to maintain. Many students have been motivated to serve in political decision-making areas where awareness of the impact of a well-designed landscape can enhance the beauty and enjoyment of life in the public arena.
